Edited by Andrew Bailey

print \$77.50 | eBook from \$54.95
(available only in Canada and the US)

The Broadview Introduction to Philosophy is a comprehensive anthology covering core topics in Western philosophy. It stands out in many ways:

- **A Mix of Classic and Contemporary Readings.** Seventy-five historical and contemporary readings are included, ranging from Plato through to the present day. Readings are substantial, and in many cases complete (including the full text of Descartes's *Meditations*).

- **Written and Edited for Students.** Unlike most other introductory anthologies, this book offers substantial assistance to help students understand the context, structure, and terminology of the provided readings. Carefully crafted introductions and thorough annotations provide the guidance needed to grapple with this material for the first time, while keeping the primary text central.
- **Comprehensive Content.** This anthology includes extensive coverage of foundational topics such as free will, God, and ethical theory, but also readings on contemporary themes such as immigration, gender, race, and epistemic bias.
- **Female Authors.** A higher proportion of readings by women than other leading introductory anthologies, with women's writing represented in each of the book's sections.
- **Instructor Support.** Supplemental materials, including teaching notes and quiz questions, are provided to instructors. Student readers also receive access to a separate set of resources, including additional questions, writing exercises, and a unique interactive tool for constructing philosophy essay outlines.

Second Edition

By Anthony Falikowski, with Susan Mills

NEW!

print \$79.95 | eBook from \$55.95
600pp | Fall 2022 | 9781554815258

Experiencing Philosophy begins with the assumption that philosophy is not merely something you know, but also something you experience and participate in. The book presents philosophical theories and ideas with reference to their practical relevance to the lives of student readers. To this end, a number of engaging features and inserts are provided:

- **Original Sources:** Numerous primary readings are included, introducing students directly to the philosophical work of diverse thinkers ranging from Plato to Martin Luther King Jr. Each reading is thoughtfully excerpted and is followed by reflective questions.
- **Philosopher Profiles:** Abstract ideas are connected to the lives of real historical figures through fascinating biographical profiles.
- **Take It Personally:** To illustrate how philosophy can be useful and relevant, each chapter begins by placing the material in a personal context.
- **Know Thyself Diagnostics:** This book takes seriously—as did Socrates—the Delphic Oracle's dictum to “know thyself.” Students are given self-diagnostics to explore their own philosophical values, ideals, and beliefs.
- **Philosophers in Action:** Philosophy is something you do, not just something you know. Prompts are provided throughout the text inviting students to conduct thought experiments, analyze concepts, and discuss and debate controversial points.
- **Thinking about Your Thinking:** These “metacognitive prompts” require students to engage in higher-order thinking, not only about the presented readings and ideas, but also with respect to their own values, assumptions, and beliefs.
- **Plus:** Built-in study guides, diagrams, famous philosophical quotations, comics, feature boxes, and more!

Tell Me Something I Don't Know is a collection of original dialogues in epistemology, suitable for student readers but also of interest to experts. Familiar problems, theories, and arguments are explored: second-order knowledge, epistemic closure, the preface paradox, skepticism, pragmatic encroachment, the Gettier problem, and more. New ideas on each of these issues are also offered, defended, and critiqued, often in humorous and entertaining ways.
