eBook from \$30.95 | print \$44.25
240pp | 2009 | 9781551119762

For any professor interested in teaching animal ethics, as well as any general reader who wishes to learn more about the central philosophical debates concerning animals, I recommend Taylor's book without reservation." — MATTHEW CALARCO, CALIFORNIA STATE UNIVERSITY, FULLERTON

Can animals be regarded as part of the moral community? To what extent, if at all, do they have moral rights? Are we wrong to eat them, hunt them, or use them for scientific research? Taylor traces the background of these debates from Aristotle to Darwin and sets out the views of numerous contemporary philosophers while covering ethical theories ranging from utilitarianism to eco-feminism.

Drawing upon the best contemporary scholarly literature and competing translations, Li unfolds widely divergent visions of the consummate human experience that can be achieved through a process of self-initiated personal cultivation. It is hard to conceive of how more of the world's wisdom could be responsibly engaged in one small book." — ROGER T. AMES, UNIVERSITY OF HAWAII

This book guides readers through 10 classic works of Asian philosophy. Several major schools of Eastern thought are discussed, including Hinduism, Buddhism, Confucianism, Daoism/Taoism, and Chan/Zen. The author connects the ideas of these schools to those of Western philosophy, thereby making the material accessible to people who are unfamiliar with the cultures and intellectual traditions of Asia. A wide range of important topics are addressed: reality, time, self, knowledge, ethics, human nature, enlightenment, and death.

In lucid and engaging prose, Murray offers a penetrating yet fair-minded critique of the traditional arguments

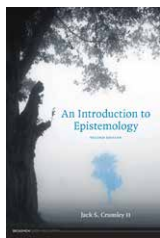

for the existence of God. The goal of this primer is to offer the best reasons going—for both sides. Atheists may learn them and have them at their disposal. Theists should be well informed of them.

Naturalism in Philosophy: An Introduction

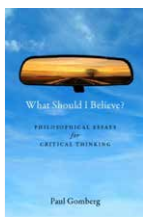

By Richard A. Richards

eBook from \$27.95 | print \$39.95
210pp | Spring 2027 | 9781554816910

Naturalism is the view that philosophical understanding

is best achieved through careful observation of ourselves and the natural world in which we live. For the naturalist, philosophy isn't something that can be done from the armchair—scientific investigation is required.

In this concise and provocative book, Richards traces the historical development of naturalism from the ancient world to the present day, showing how it can provide a coherent and productive framework for answering philosophical questions. From metaphysics and epistemology to ethics and aesthetics, *Naturalism in Philosophy* shows readers what a naturalistic approach to the core areas of philosophy looks like. And while Richards ultimately presents naturalism in a positive light, he doesn't shy away from discussing its most serious challenges. Readers will come away from this book with not only a firm grasp of naturalism, but also a greater appreciation for philosophy itself.

HISTORY OF PHILOSOPHY *continued*

Evil, Suffering, and Pessimism: Readings from the Darker Side of Modern Philosophy

NEW!

Edited by Corey W. Dyck, Fabio Malfara, and Ignacio Moya

eBook from \$27.95 | print \$ 39.95
306pp | Spring 2026 | 9781554816675

"This excellent anthology opens fresh pathways into modern and nineteenth-century philosophy. Each selection has been

meticulously edited for clarity and provided with a thoughtful introduction." — IAN PROOPS, UNIVERSITY OF TEXAS AT AUSTIN

Is it possible to explain the existence of evil under the supposition of a supremely good creator? Are we ourselves the cause of most of the suffering that befalls us? Is life generally more painful than it is pleasant, and if so is non-existence preferable to existence? Is happiness ever even attainable?

These questions occupied some of the best-known philosophers of the seventeenth to nineteenth centuries—figures such as G.W. Leibniz, Pierre Bayle, David Hume, Jean-Jacques Rousseau, Voltaire, Immanuel Kant, Arthur Schopenhauer, and Friedrich Nietzsche. They were also richly discussed by writers often since excluded from the philosophical canon, such as Ottobah Cugoano, Mary Astell, and Olga Plumacher. In this unique and provocative anthology, one will find philosophers bending their intellectual efforts to the darker side of life.

"Instructors and scholars of early modern philosophy have desperately awaited this

anthology, frustrated with existing collections that present an outdated and narrow canon. Shapiro and Lascano's impressively rich compilation reflects current scholarship, which has rediscovered many previously overlooked texts and topics. This versatile anthology should work beautifully for traditional courses on early modern philosophy, for drastically reconceived courses, or for anything in between." — JULIA JORATI, UNIVERSITY OF MASSACHUSETTS, AMHERST
